

Settlement & Environmental Impact Report

Value recovery settlement with reuse, recovery & diversion metrics

Report No.: SIR-SAMPLE-000000 Date Issued: 2026-01-15

This report summarizes the financial settlement and environmental outcomes for the referenced project. Settlement figures shown are illustrative placeholders only — actual settlements are governed by the client agreement and are not published. Environmental metrics summarize reuse, material recovery, and landfill diversion.

ENGAGEMENT DETAILS

CLIENT
[Client name withheld on sample]

PICKUP / PROJECT ID
PRJ-SAMPLE-0000

SETTLEMENT MODEL
Revenue-Share Credit

REPORTING PERIOD
Q1 2026

TOTAL ASSETS PROCESSED
42 units

LANDFILL DIVERSION
98.6% by weight

DISPOSITION & IMPACT SUMMARY

Outcome	Units	Weight	Notes
Refurbished & remarketed	24	310 kg	Reuse — highest value path
Harvested for parts	6	70 kg	Components returned to supply
Material recovery (recycled)	11	240 kg	Certified, audited channels
Destroyed (IP / data security)	1	12 kg	Serialized CoD issued
Landfilled	0	9 kg	Residual non-recoverable only

ATTESTATION

Settlement values are intentionally omitted from this sample. In a live report, net settlement is itemized and reconciled to the client agreement, and environmental metrics are derived from serialized disposition records. Material recovery is routed through certified, audited downstream channels. Circuitry Solutions holds R2v3 (SERI) and ISO 14001 certifications.
